Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Stress and stressors are an inherent part of warfare because of the violence, the physical conditions, and duration of operations. It has been studied and documented that some stresses are good for an individual because they improve performance. Stress represents the mobilization of the body and mind to counteract stressors. It can be positive or negative. A stressor is any event or situation that requires an unusual change in the way a person responds. This study looks at why the military is reactive in its battle against combat and operational stress and how it can become proactive. The study examines not only the adverse impact on a soldier's performance in a stressful combat or operational environment, but it also addresses the individual's ability to function once he/she is no longer in a stressful combat or operational environment. This in turn can minimize the number of service members that need to be treated for long-term medical conditions that develop because of COS. This study examines how we can better prepare U.S. service members to handle Combat and Operational Stress. This paper addresses ways to minimize the adverse effects of COS. Adverse refers to physical, mental,...
