

Representation of Universal Algebra: Polymorphism (Paperback)

By Aleks Kleyn

Createspace, United States, 2015. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.Module is effective representation of ring in Abelian group. Linear map of module over commutative ring is morphism of corresponding representation. This definition is the main subject of the book. To consider this definition from more general point of view I started the book from

consideration of Cartesian product of representations.

Polymorphism of representations is a map of Cartesian product of representations which is a morphism of representations with respect to each separate independent variable. Reduced morphism of representations allows us to simplify the study of morphisms of representations. However a representation has to satisfy specific requirements for existence of reduced polymorphism of representations. It is possible that Abelian group is only -algebra, such that representation in this algebra admits polymorphism of representations. However, today, this statement has not been proved. Multiplicative -group is -algebra in which product is defined. The definition of tensor product of representations of Abelian multiplicative -group is based on properties of reduced polymorphism of representations of Abelian multiplicative -group. Since algebra is a module in which the product is defined, then we can...

Reviews

An incredibly wonderful ebook with lucid and perfect answers. It is written in easy words instead of difficult to understand. It has been printed in an exceptionally easy way in fact it is simply following I finished reading this publication in which really modified me, modify the way I think.

-- **Mr. Keyshawn Weimann**

This type of book is almost everything and helped me hunting forward and more. I was able to comprehend almost everything using this published e pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.
