Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: . . . Such methods are very generally in use, and the buildings so erected are of the class which make the reputation of reinforced concrete as a building material. --Engineering News. His Christmas Gift An architect, who is also an enthusiastic chicken fancier, spends much money coddling blooded hens that do not begin to pay for their keep. He had several hens guaranteed to be the best sort of layers, yet morning after morning he returned empty-handed from his search for eggs. By December he had about given up hope. So on Christmas morning he was delightfully surprised to find four beautiful, pearly eggs in a nest. He quickly gathered them up, planning just how triumphantly he would show them to his skeptical wife. Not until he reached the door of the house, and the bright morning light fell on the eggs, did he notice that each one bore the neatly penciled greeting: Merry Christmas From the Old Hen. The Strength of Concrete Poles ESTS on reinforced concrete poles were recently conducted by the Carnegie Steel Company at its plant in South Sharon, Pa. , with the view of determining the relative cost and strength of that material as compared with wood for such construction. The poles tested were 32 ft. long, 10 in. square at the butt and 6 in. square at the top. All corners were beveled and iron steps bent up Y in. were inserted in the forms before placing the concrete. The...
